

About Us - Blue Elephant Energy AG

Blue Elephant Energy AG (BEE) is one of the leading renewable energy infrastructure investors and operators in Europe. BEE acquires, develops and operates solar and wind power plants in Europe and the rest of the world, currently producing sustainable energy for more than one million households. Since its foundation in 2016, BEE has invested more than EUR 1 bln in renewable energy infrastructure. It currently has over 2 GWp of renewable energy capacity under development.

We are a very dynamic organization with currently a staff of about 60. We do great things, big projects and large deals but in a familiar team atmosphere.

Support us in our mission

Our portfolio is growing continuously and with it our daily tasks. Whoever is interested in learning a lot, taking on responsibilities in important tasks and is interested in an internship that provides a steep learning-curve:

6-months internship in Renewable Energy Project Development

Tasks

- Support in all aspects of renewable energy project development (focus on solar projects) including financial modelling and management of the entire project development process
- Research and preparation of market analyses (e.g. analysis of revenue regimes, electricity markets and regulatory framework conditions in foreign markets)
- Support in the analysis of project development opportunities and investment objects (solar parks, storage facilities, M&A, etc.)
- Assistance in the preparation of financial models and/or yield calculations (IRR, RoE etc.)
- Maintenance of the current deal flow; support on transactions and due diligence reviews

Required skills

- Business Management, Energy Management or related degree, currently in the final stages of studies and with relevant internship experience (ideally in the energy industry/market)
- Extensive MS PowerPoint and MS Excel skills/financial modelling is advantageous
- A very good command of English, French (native or proficient); German is advantageous
- Some knowledge of the energy industry (power exchanges, PPAs, etc.) is an advantage
- Proactive, structured, and motivated individual who actively contributes to our team efforts

What we offer

- Fair compensation
- Very attractive workplace in the center of Hamburg (Jungfernstieg)
- Hybrid and flexible working structure
- Public transport ticket
- Good karma through participation in the energy transition

Are you interested in helping to expand Blue Elephant Energy AG? Then we look forward to getting to know you:
